

## Underwater Street, the children's discovery centre, is an educational hub for children of all ages

Underwater Street, the children's discovery centre, is an educational hub for children of all ages.

Underwater street manages to make learning both fun and interactive and is ideal for Foundation Stage and Key Stage 1. Not only does it cover the six areas of learning for the Foundation Stage it also has been highly commended for Key Stage 1 Science, Design and Technology and Art and Role Play.

In the Lab children can experiment with magnets, electricity, light and pulleys.

Our construction table allows the children to design, build and experiment with boats or cars powered by different forces.

Our well stocked craft table is always busy with creative activity and is part of our Alternative Art section where children can learn about colour mixing while painting a real car, paint a portrait on a see thru easel or make a picture from play balls.

Imagination Street allows the children to dress up and interview each other in T.V. Studio or work in the supermarket, learn about fractions in the Pizzeria or look after our dogs in the Pooch Parlour.

The Sensory Area awakens every sense between the aroma wall, the watery cave, the sound boxes, story tent, reverse vision and the feely boxes.

With Coach drop off directly outside and excellent facilities for packed lunches please call or visit to see why teachers have raved about Underwater Street and children never wanted to leave.

We can also offer the centre for private visits on a Monday to groups of 90 children or more subject to availability.

Underwater Street is a place that promotes learning through discovery and thus promotes self esteem. A child will always feel good about their visit to Underwater Street.

For more information please visit our website

[www.underwaterstreet.com](http://www.underwaterstreet.com) or call us on 0151 227 2550.

Underwater Street is located in the lower ground floor of the Cunard Building at the Pier Head.

Underwater Street, The Cunard Building, Water Street, Pier Head. Liverpool L3
